

We are Datema.

## Chartplanner 5 - A glimpse into the future

We proudly present the newest version of Chartplanner, software for management of all your electronic charts and books licenses onboard. Chartplanner is the backbone of our digital services onboard vessels. Of course we continue to improve this software, so that we anticipate on the latest worldwide developments in ENC services and the extensive digitalisation of charts and books.

The Chartplanner service currently allows you access to order ENC's, AVCS and ARCS navigational charts, digital ENC updates, dNtM and T&P notices services and has a fully automated planning and ordering process. There is no physical handling of any kind. The result: Chartplanner allows you to order permits, updates and digital NtMs by email within seconds, 24/7 and online anywhere in the world.

### What's new in the software

With the new software we added features making the use even more easier than before.

### ENC viewer

View all your ENC charts directly in Chartplanner! This module allows you to effortlessly view charts and data for all your active permits. Thanks to the full ENC kernel, you can choose which layers are visible and easily use the pick report function.

### Port Pro

Port formalities? You can now arrange them in just a few clicks! Port Pro simplifies the completion of port arrival documents. Enter your general data once and automatically receive the correct documents for your chosen agent, port and voyage. Less administration, more time at sea!

### Modernization of the UI

A fresh, modern user interface that is still as simple and intuitive as you are used to.

### Medic export to Excel

Now easily save medical documents in Excel format. Efficient and clear!

### Webshop integration

Browse the Datema catalogue directly in Chartplanner and easily order physical safety products via our webshop.
